PROFILE

An astute, driven and assiduous Full Stack Web Developer with over 5 years' experience.

I'm a skilled Full Stack Developer with a wealth of diverse life and technical experience that I bring to every project.

I follow form as well as function. I know that the aesthetics of effective design combined with application speed, security and reliability combine to create a great user experience.

I work quickly and effectively in getting things built and working across the stack. I'm an excellent communicator who thrives in bright and enthusiastic teams and I'm also a self-starter when working solo.

I'm skilled in User Experience Design using the trinity of HTML/CSS/JavaScript. I also have extensive experience in Front End Frameworks such as Angular and React.

I specialize in data-driven web applications. Many of my projects utilize document-based data. I use Python and Django in conjunction with MongoDB to process and present information.
